

(A) Number of relapses per infective bite

Adjusted for masking (10 day windows)

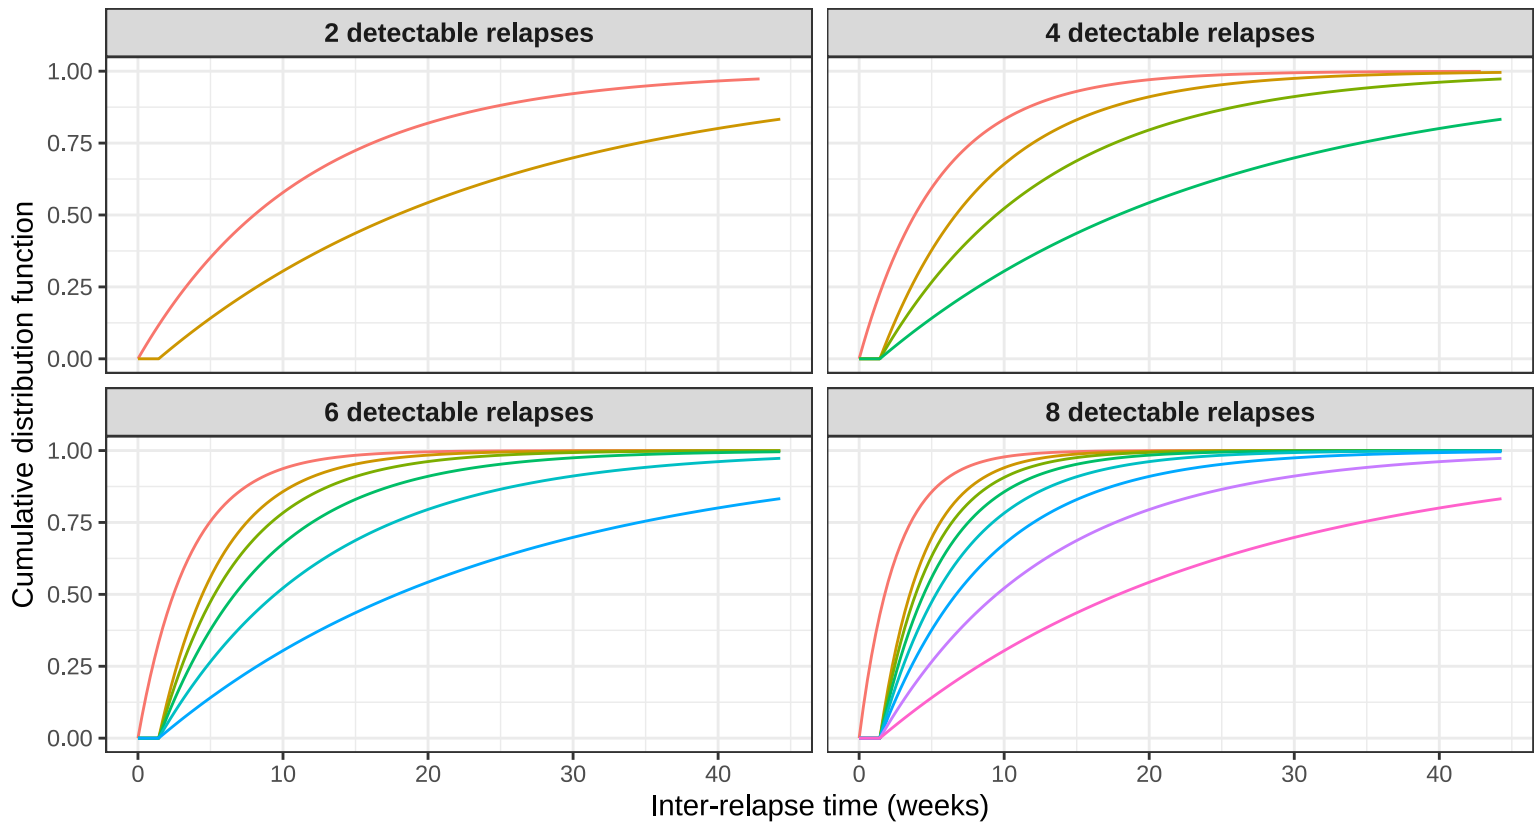

- detectable relapses (i.e. separated by ≥ 10 days)
- hypnozoite activation events

(B)

Inter-relapse intervals for a single infective bite

Adjusted for masking (10 day windows)

- Interval
- bite to 1st relapse
- 1st to 2nd relapse
- 2nd to 3rd relapse
- 3rd to 4th relapse
- 4th to 5th relapse
- 5th to 6th relapse
- 6th to 7th relapse
- 7th to 8th relapse
